

Advanced HazMat Management "Five Steps to Success" program is an intensive one day course, 8 hour program, designed to enhance the skills, knowledge, and confidence of HazMat team members. The contents of this program is an easy five step process to Street Smart Chemistry that simplifies HazMat mitigation.

If it's your responsibility within your organization to keep your HazMat team members trained to the highest level of emergency response, I would like to share with you this new and refreshing program that can make any hazardous materials incident, large or small, very easy to manage by using five easy steps.

This course is a one of a kind, no other program looks at the HazMat response in this manner, and no other program brings live chemistry right into the classroom for identification purposes of the unknowns.

COURSE OVERVIEW

This course takes HazMat response to a totally different level. The course presents a five step process that no one has ever looked at before. It makes the HazMat response so simple that even non-HazMat personnel will understand it. There are no cheat sheets or charts needed with this proven five step process, just five easy steps that will last throughout your professional careers.

Emergency Management Technologies, LLC's "Five Steps to Success" Street Smart Chemistry 8 Hour Course will refine participants' decision-making skills, enabling them to protect the public and the environment in the first critical minutes of a HazMat Incident that can make the difference. Our staff of instructors will review numerous topics, including simple extraction of need to know information from chemical and physical properties of known chemicals. Instructors will review first in technologies to an incident and will refine the student's skills on RAD meter, CGI, Temp gun, pH paper, F paper, PID, FID, direct-reading instruments, and sampling and collection procedures per DOD and FBI CSM guidelines. The student will also be challenged with live chemistry, *Solids, Liquids, Paste and Gels* while trying to identify **unknown chemicals** using your HazMat team's infrared spectroscopy (HazMat ID) or Raman spectroscopy (Ahura First Defender/Tru-Defender). This hands on evolution builds confidence in your technologies and develops great teamwork.

TESTIMONIALS

This course is getting outstanding reviews from everyone who has attended. The testimonials that we are getting back from our students are all the same.

"WOW! It's too easy, and it takes the guess work out of the equation." – Jeff, WPBFD

"As soon as the alarm sounds and before we get to the HazMat vehicle to respond we have a good understanding what tactics to deploy upon arrival." – Carlos, PWFD

"The info from this course is what every company officer and every HazMat tech should know. It's so easy to understand and remember. What a difference this will make when responding to my next HazMat Incident!" – Troy, FT. LAUD. FD

"I've been on a HazMat response unit for 16 years and every HazMat incident seems to take forever before we get started, not with this program, I can remember these five easy steps for the rest of my career. It's that easy to grasp." – Robert, MFD

Call or email us today to schedule this program and deliver it to your department or your (LEPC) local emergency planning commission.
